

Slimline, Contemporary Aluminium

Lanterns | Skylights

Ultrasky[®]
By Ultraframe

The Ultimate in Flat Roof Design

Ultrasky Lanterns and Skylights - the stylish design choice

Within slimmer frames and less bars than competitor Ultrasky lanterns and skylights are designed to flood natural light into the room below and to maximise views of the sky above.

- Lanterns with 25% less bars than competitors
- Frameless Flat Skylights
- Every product packed with thermal breaks
- The perfect complement to contemporary Aluminium

Ultrasky Lantern

Elegant, uninterrupted sight-lines

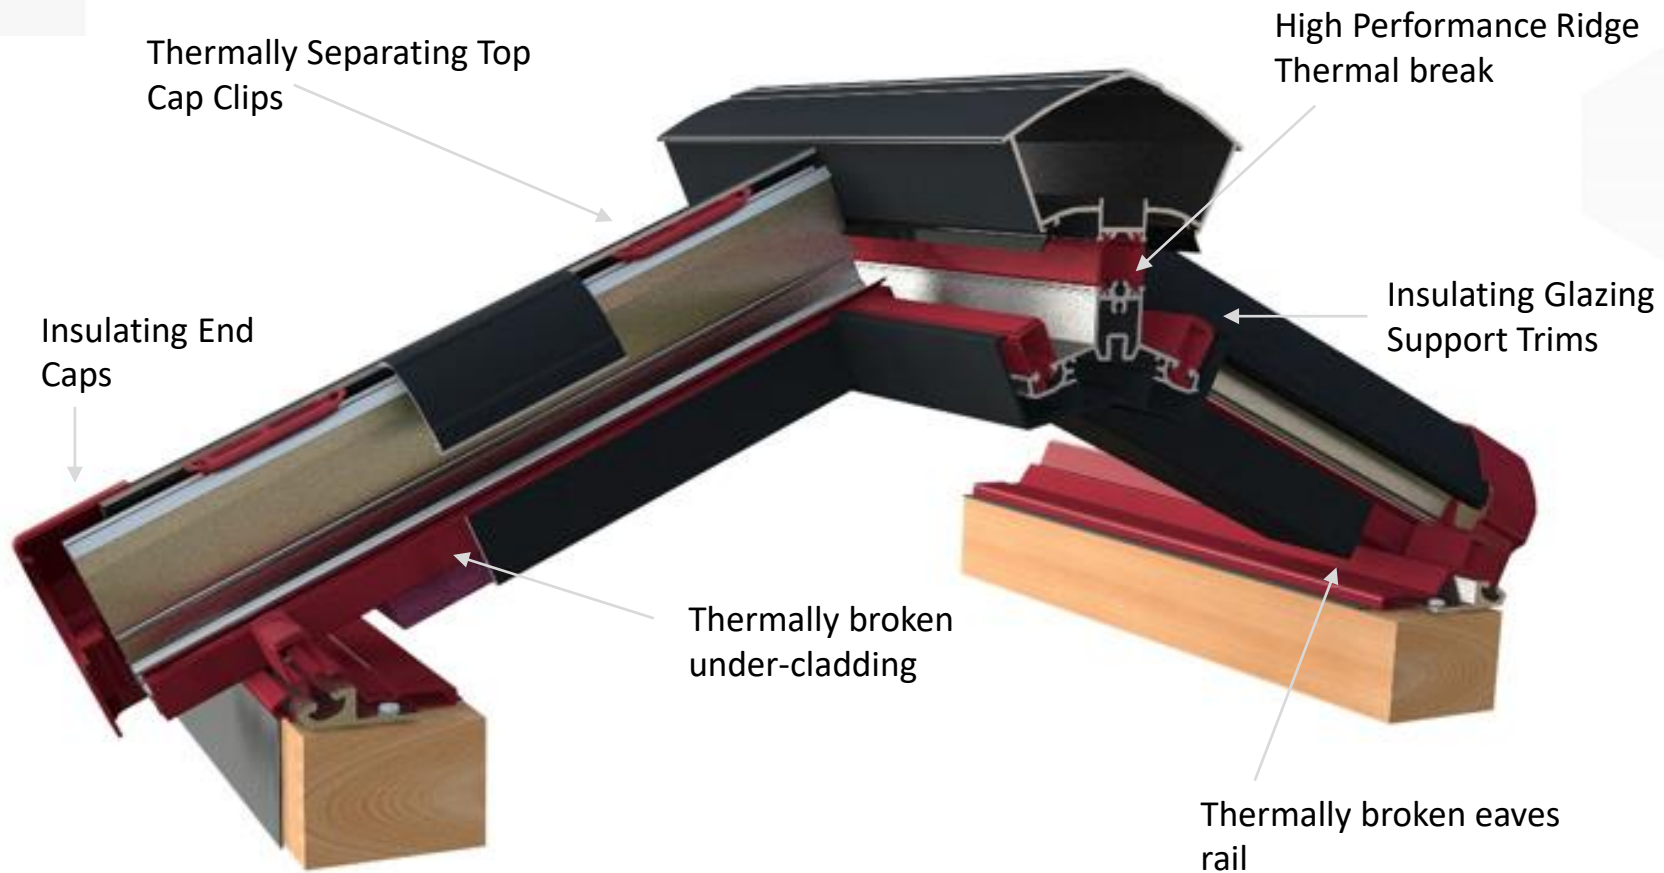

With a 25° pitch the Ultrasky lanterns is a stunning addition to any extension and floods the maximum amount of natural light to the room below.

- Designed to match any door or window frames
- Available in any RAL colour
- Choose Aluminium or uPVC inside and out
- Super-strong – max size of 4 x 5.8M

Thermally Broken – Inside and Out

Reduces the risk of condensation in kitchen extensions where temperatures fluctuate rapidly

Storm Shield Protection System

Triple layer protection against the elements

The storm shield at the ridge end has three layers of protection to prevent any water ingress in high winds and heavy rain

1. Waterproof glazing compression trims
2. Ridge end weathering shields
3. Secure fit ridge end covers

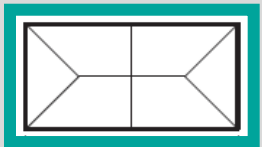

Less Bars than other Lanterns

Super-strong for better views and maximum light

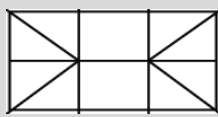

Thanks to their super-strong ridge Ultrasky Lanterns have fewer bars than other lanterns ensuring they look elegant even in large extensions.

- 25% less bars than other lanterns
- Elegant 25° pitch to optimise natural light

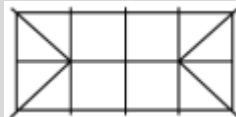

On the 2 x 4m lantern in the photograph Ultrasky has less bars than its competitors

What makes Ultrasky Lantern unique?

WEATHER TESTED

Watertight in winds up to 130mph

- **Triple layer storm shield** at radius end.
- **Less bars**, less potential points of failure.
- Sturdiest, most **durable** gaskets and glazing stops.

CUSTOMISABLE

Unbeatable range of design options

- Bespoke colours to match doors, windows and decor.
- Available in PVCu and aluminium inside and out.

WARMEST

Unrivalled thermal performance

- Thermally broken inside and out.
- Thermally insulated eaves rail.
- Fully insulated aluminium undercladding.
- Supplied with a range of high performance glazing.

FASTEST

Quickest assembly time

- No drilling or cutting required.
- 25% fewer bars for a faster fit.
- Easy and quick to glaze.

STRONGEST

Strongest lantern on the market

- Maximum size 4m x 5.85m.
- UK's strongest ridge with an IXX value of 2,226k for fewer bars and larger spans.

MINIMALIST

Fewer bars for better views

- 25% fewer bars than conventional glazed roofs.
- Superior bar and ridge strength for larger panes of glass.
- No bulky radius ends.
- Neat internal finish at radius end.

Ultrasky Flat Skylight

Elegant, uninterrupted sight-lines

The **Ultrasky Flat Skylight** provides an element of style to extension and orangery roofs and floods natural light into the room below.

Its distinctive sleek, frameless edge to edge glass gives a stunning contemporary look that allows the largest possible amount of natural light to flood into the room.

Sitting flush with the internal plasterboard, the **Ultrasky Flat Skylight** looks frameless from the inside, giving your room a bright open feel.

High Quality Contemporary Design

Modern, slimline aluminium

The Ultrasky Flat Skylight combines modern slimline design features with high quality components

1. Edge to edge glass for a contemporary look
2. Fineline plasterboard trim to a neat internal finish
3. Slim aluminium surround
4. Fully insulated frame with 'Warm-Frame' technology
5. Click-fit clips for fast fitting first time every time
6. Noise reducing glass
7. Double seal gaskets that won't degrade over time
8. Insulated kerb

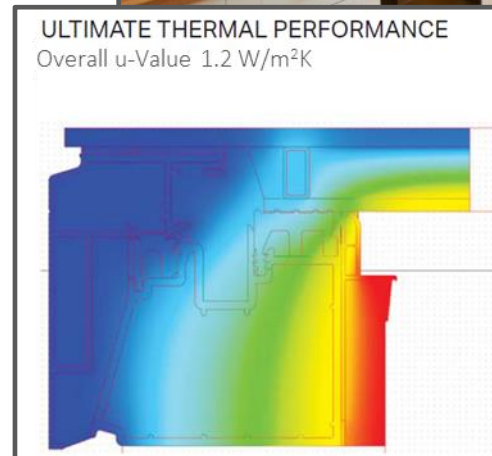

High Thermal Performance

Fully insulated to help prevent condensation

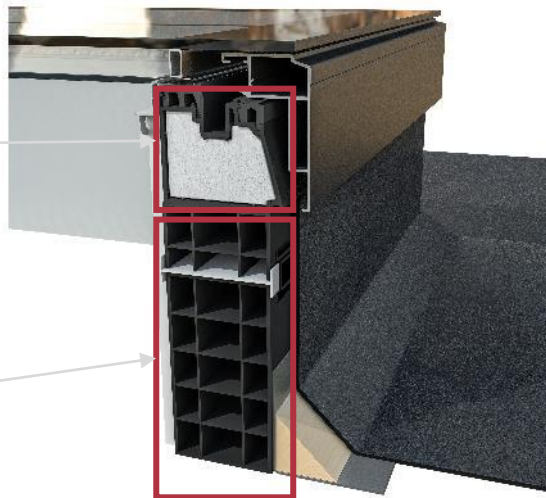

In kitchen extensions where temperatures can fluctuate quickly it is important that skylights are insulated. This avoids any cold bridging from outside to in which could cause condensation if you are cooking when it is cold outside.

The Ultrasky Flat Skylight has a fully insulated frame and insulated kerb and an overall uValue of 1.2

Insulated Frame with
'Warmframe'
technology

Insulated Kerb

High Performance Glass

Reduces noise by up to 34 decibels*

- Outer Layer
 - 6mm Toughened Glass
 - Choose Neutral or Blue glass
 - 16mm Argon filled cavity
 - Warm edge spacer
- Inner layer
 - 4mm (*up to 1.9M²) or 6mm
 - High performance
 - Low E
 - Toughened

What makes Ultrasky Flat Skylight Unique?

MINIMALIST

Distinctive frameless glass

- Edge-to-edge glass for a contemporary look.
- Fineline plasterboard trim for a neat internal finish.
- Slim aluminium surround blends seamlessly with glass.

EASIEST

Unique click-fit installation

- Precision click-fit installation process for quick fitting first time, every time.
- No fiddly trims.
- 50% faster to fit than other skylights.
- Welded kerb and skylight can be installed together, saving time.

CUSTOMISABLE

Unbeatable range of design options

- Bespoke sizes available.
- Grey, black and white standard colours.
- Available in any RAL or special colour.
- Available in clear and blue glazing options.

WARMEST

Fully insulated core

- Fully insulated frame with warm frame technology.
- Optional thermally efficient kerb available.
- Overall U-Value of 1.2.

QUIETEST

Unbeatable noise reduction

- Noise reducing glass.
- Combination of 4mm and 6mm stepped units, deliver up to 34dB noise reduction.

FASTEST

Quickest installation time

- Simple click-fit frame.
- Waterproof kerb provides seal to skylight.
- One step installation process for kerb and frame.
